# DIGITAL SKILLS FOR ADULTS

## DIGIT-ALL Project

DATE 28/10/2021

Newsletter #n°3

### Dear reader,

**DIGIT-ALL** is an Erasmus+ project that aims to improve and extend the supply of high quality learning opportunities tailored to the needs of low-skilled or low-qualified adults by making available flexible learning offers adapted to their learning needs (e.g. blended learning, digital learning applications), and by the validation of skills acquired through informal and non-formal learning. The **DIGIT-ALL** project will develop digital skills in adult learners with a low level or with no digital competences at all, and, at the same time, certify them under a European framework.

The three online courses with their topics available to train adult people with low digital skills are:

- **Course 1** - Safety (Level 2)
- **Course 2** - Information and data literacy (Level 2)
- **Course 3** - Communication and collaboration (Level 2)

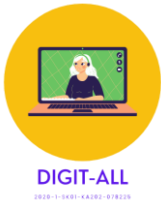

A Transnational Project Meeting took place in Syros, Greece, from 27<sup>th</sup> of September to 1<sup>st</sup> of October.

The meet started by a review of the preliminary version of the course by all partners.

This meeting was, in fact, a short training event and peer training, a joint learning and exchange between the partners.

The main focus of this meeting was the training of partners in andragogic methodologies and tools, in order to certify skills for adult education which will be gain through non-formal education for adult learners.

The use of an e-learning platform also required some training, as well as the use of digital toolkit to produce them and in gamification.

Co-funded by the  
Erasmus+ Programme  
of the European Union

This pilot will be used as the guiding materials to develop all courses.

All participants answered a quality survey to measure their satisfaction with the event and how this event has improved their skills to run this project.
